SUMMARY

Dynamic and results-driven software developer with 5+ years of experience in building high-quality web applications. Skilled in full-stack development, with expertise in React, Node.js, Python, Flask, and cloud technologies. Passionate about optimizing system performance, ensuring code quality, and delivering user-centric solutions. Excellent at collaborating with cross-functional teams to drive business growth and technical innovation.

SKILLS

- Languages: JavaScript, Python, HTML5, CSS3, SQL, C++
- Frameworks: React, Node.js, Flask, Django, Express.js
- Databases: PostgreSQL, MongoDB, MySQL
- Tools: Git, Docker, Kubernetes, Jenkins
- Cloud Platforms: AWS, Azure, Google Cloud
- Software Development: Agile, Test-Driven Development (TDD), Continuous Integration
- APIs: RESTful API, GraphQL, OpenAl API
- Other: GitHub Actions, Jira, AWS Lambda, Firebase, Elasticsearch

EXPERIENCE

Full Stack Developer

ABC Technologies, City, State

January 2020 – Present

- Developed and maintained full-stack web applications using React, Node.js, and Flask, delivering high-performance, scalable solutions for clients.
- Integrated cloud services on AWS, including S3 for file storage, Lambda for serverless execution, and RDS for database management.
- Designed RESTful APIs and managed backend systems with PostgreSQL and MongoDB to ensure smooth data flow and high availability.

• Led a team of 4 developers in adopting Agile methodologies, improving project delivery time by 25%.

Junior Software Engineer

XYZ Solutions, City, State

June 2017 - December 2019

- Assisted in the development of a SaaS platform using React, Express.js, and MySQL to serve over 100,000 users.
- Optimized front-end performance by reducing load times by 30% through efficient use of React's lifecycle methods and lazy loading.
- Implemented user authentication and authorization features with JWT and OAuth2.0.
- Conducted code reviews and collaborated with cross-functional teams to identify and resolve issues promptly.

EDUCATION

Bachelor of Technology in Computer Science

XYZ University, City, State

Graduated: May 2017

PROJECTS

Resume Tailoring and Job Matching Platform

• Developed an AI-powered resume tailoring platform using Flask, React, and spaCy to optimize resumes for ATS and match users to relevant jobs based on real-time job APIs.

Smart ATS Analyzer

• Designed a system that analyzes resumes against job descriptions using machine learning models to improve job matching accuracy and automate hiring workflows.

IoT-based Traffic Control System

 Built an IoT-based traffic control system with real-time traffic data processing and computer vision to optimize traffic flow in busy cities.

CERTIFICATIONS

- Full Stack Web Development with React & Node.js XYZ Institute
- Cloud Computing Specialist ABC Academy
- Machine Learning for Developers Coursera
